

Austrey NDP Review Launch 7 May 2023

Questionnaire responses and **LK Suggested Changes to NDP for SG Discussion**

Q1: Existing hedgerows, ditches, water bodies, broadleaved woodlands and mature, ancient and veteran trees are all important local landscape features in Austrey. Are there any other local landscape features you think are important and should be protected and improved?

Comment	Response
Yes ridge and furrow fields; the 'swamp' in The Bishops Field	LK – add ridge and furrow to Policy AP1? BF already a LGS so protected.
Xxxxxx	-
Austrey's dark night sky is fast disappearing due to increasing levels of light pollution both from within the village and from outside, this has serious implications for the natural surroundings mentioned above and also for people's health and well being. I moved to Austrey in August 1979 from Birmingham and was immediately struck by the dark skies compared to the city. It was a requirement when walking around the village at night to carry and use a flashlight because it was so dark! Unfortunately, there is now a constant "glow" in the night sky. Ironically light pollution is one of the easiest forms of pollution to tackle successfully but is rarely mentioned or thought about. The Parish Council could give leadership and advice on this matter and lobby other responsible authorities such as North Warwickshire BC and Warwickshire CC to adopt measures to fight it. The International Dark Sky Association has an excellent website for help and advice on tackling this insidious form of pollution.	LK – add dark skies / light pollution to AP1?
Old buildings	Covered by heritage policies in Local Plan
There have been several beautiful old trees removed over recent years, on main road itself (one of which had a preservation order). It would be good to ensure that this only happens when it is absolutely necessary and that plenty of our important trees are protected.	Covered in AP1
the local fields should be protected as they are widely used by residents	Protected by settlement boundary of village in Local Plan
Open spaces	Refer to Local Green Spaces AP2
Green areas with public footpaths, often used for dog walking should be retained as green. Eg bishops field	Refer to Local Green Spaces AP2
nothing in addition to those mentioned	-
none	-
Wild meadows	LK - Where are the wild meadows?

Comment	Response
The woodland off cinders lane should be protected to help retain a wildlife and nature area with the village, the small 'swamp' area in bishops field I also imagine has an abundance of wildlife within it	Possible LGS?
Any green spaces outside of the village boundary should not be developed	Protected by settlement boundary of village in Local Plan
Footpaths. Does the " Tree Field" need monitoring?	Footpaths protected in other legislation as PROW Where is this?
The Bishops field, the church yard, pond at the junction of Warton Lane and Bishops Cleeve, millenium wood post felling, Cinder Lane hedges, restore hedgerows in the mono-culture that has been created around the village boundary & finally Salt Street.	SG to check – covered by LGS? AP1 protects hedgerows and encourages new planting
Better definition of veteran trees required. The above description is too subjective. Front lawns are also important features of many houses in the village providing valuable green space and softening the streetscape. Fully tarmac/paved front of properties should be resisted.	Insert definition of veteran trees
Green areas around village to be kept, hedgerows not ripped out, Tree Preservation Orders on Trees kept.	All covered in NDP
The views from surrounding villages down into the village, ridge and furrow fields, the Bishops Field and all the footpaths interlocking from there	Refer to Views – Policy AP3 and check covered.
Fields	Protected by settlement boundary of village in Local Plan
Bishops Meadow	LGS
Open fields and countryside, grazing for livestock	Protected by settlement boundary of village in Local Plan
Yes	-
No	-
The public footpaths in and around Austrey should be protected and maintained to ensure they are usable. The village green should also be protected and maintained, and people should be encouraged to use it for village events.	Footpaths protected in other legislation as PROW Village Green – assess for LGS
Green spaces	Refer to LGS
"- The approach to the village down Norton Hill is especially characterful and charming. The ancient wooded banks and hedgerows/ditches should be protected and the narrow road retained as a natural "traffic calming" feature at the entry to the village. (Maybe priority status and signage could be added to formalise the situation?)	SG to consider – mention in NDP?

Comment	Response
- The small field behind Glebe Rise which is currently used as stables and a paddock for horses and llamas is one of the few remaining medieval Ridge and Furrow formations in the area. The field is also home to a number of managed beehives. This diversity of use should be protected."	Add ridge and furrow to AP1.
Increase number of hedgerows promoting biodiversity , provision of water feature	-
Pond to field behind church needs cleaning out.	Refer to PC
Trees,	-
Footpaths and fields/farmland surrounding the village.	Footpaths protected in other legislation as PROW Fields around village protected by settlement boundary of village in Local Plan
Footpaths and fields/farmland surrounding the village.	Footpaths protected in other legislation as PROW Fields around village protected by settlement boundary of village in Local Plan
Archaeological earthworks Bishops Field. Water control systems /drainage unimpeded for wildlife ecological reasons	Refer to LGS
Footpaths and fields/farmland surrounding the village.	Footpaths protected in other legislation as PROW Fields around village protected by settlement boundary of village in Local Plan
Historical buildings,	Covered by heritage policies in Local Plan
The Bishops field has original ditches and shape from old village which is a key backdrop to the historic church.The allotment by the church has original brick animal shelters and ancient hedges and trees that form and essential backdrop to the historic church	Refer to LGS
Yes. Opposite the shop. The grass verge is being used as a car park for the shop. It was always kept beautiful and now, especially in the winter months, it's just a mud bath and an eye sore!	SG to discuss – LGS?
Crisps Farm	-

Q2: Newton Lane Playing Fields, The Old Cricket Ground (at the rear of Farthings) , Bishops Field, the field to the northeast of Hollybank and the new play area/village green are proposed as Local Green Spaces to protect them from future development. This would give similar protection to Green Belt around towns. Please give any reasons why you think these areas are important.

Comment	Response
	Noted – refer to support in NDP – justification for LGS
They are key parts of our village and ones that we identify as being part of Austrey. Many of them are viewed when residents are walking round our village	Noted
Xxxxx	Noted
If not protected these areas would eventually be sold for development at some time in the future, leaving the village with little or no green space witin the village.	Noted
It's important to have local safe green spaces for all to enjoy.	Noted
Gives the community a safe place for families to enjoy outdoor activities, not much walking area without roads	Noted
despite being surrounded by such a lot of countryside, there is actual not much communal space for recreation, (children to play, adults to exercise, areas to exercise dogs), so these areas are vitally important, especially as the population of the village increases.	Noted
they are used by the whole community for various reasons but they are the heart of our community bringing us all together at events and walking the dogs with other villagers	Noted
Need to stop overdevelopment of this village. Open spaces give villagers a place to exercise, meet up enjoy being outdoors. A place for flora and fauna to flourish	Noted
See above. All these areas are well used as recreational green spaces	Noted
It is important for all people to have safe easy access to green spaces , for enjoyment , exercise , hobbies and sports	Noted
These areas are important to maintain a sense of the countryside. Greenery is good for one's mental health. These areas are used by walkers and dog walkers alike. They also house important wildlife. Areas of green space have already been lost to development, it would be a shame to lose the last few spaces in and around Austrey	Noted
There is a lack of green space in Austrey. We need to protect these to prevent them being used for development to ensure the health and mental health of residents	Noted
To ensure green spaces between developments and wildlife habitat is not fragmented. For a village we have already lost too much green space and wild flower meadows.	Noted
This protection is essential to the village and must be protected, they provide areas where adults and children	Noted

Comment	Response
alike both use regularly and are areas that are essential to keeping the village a village for the current and future generations - without these area you will loose the village and Austrey will become another new build estate with all the joys that brings with it (crime, noise, no green space and lack of facilities)	Noted – refer to support in NDP – justification for LGS
Areas that are for communal gatherings, dog walking and exercise are key for small villages so they can maintain an active lifestyle in a safe environment	Noted
Social use for families and walkers. We need green areas for the village atmosphere & nature.	Noted
They are the last vestiges of eco systems in the sterile environment that has been created by the agro industrial farming of the Austrey valley	Noted
Beautiful amenities for village to use.	Noted
Stop over development and stop developers adding extra housing to new estates.	Noted
They are areas of importance for the village; they serve as a meeting place as well as a great place to walk and meet like minded villagers. Many friendships have been developed from meeting in these fields and they are great for both the mental and physical health of the villagers	Noted
Green space and areas designated for young people is important in giving young people a space to place and keep active	Noted
Extremely important for nature and the environment	Noted
Definitely enough green Belt already built on it would be nice to walk and see trees Grass etc	Noted
To preserve the green space for the well-being and use of Austrey residents	Noted
Important to maintain traditional elements of the village whilst providing suitable amenities across the village demography	Noted
These areas are needed for kids to play and somewhere to go.also, nature we are blessed with being surrounded by nature, we have all sorts come and visit us from foxes, owls, hedgehogs, pheasants and all types of birds.	Noted
Key features and community spaces	Noted
Given the need for bungalows, I think a small area of Bishops Field (at the rear of Main Road / Bishops Cleeve) would be ideal being situated near all the local amenities (shop, pub, church and bus route) which elderly people need.	SG – discuss? Presume they are suggesting taking some of this out for devt?
As the village grows it is becoming more important for the health and well-being of residents that we have access to these green spaces. If anything, we should add to this list as the number of residents has increased substantially since the original Plan was published.	Noted

Comment	Response
	Noted – refer to support in NDP – justification for LGS
they provide valuable wild life habits and communal and exercise space for villagers	Noted
- All these Local Green Spaces are important to the community and should be protected from development. Other open, green spaces within the village boundary and adjoining it should also be protected from development. The Covid pandemic proved how important open spaces can be. Once built on, it is too late to go back.	Noted
An alternative area for green belt should be considered if the HS2 service station goes ahead .	HS2 will re-provide lost areas of playing field
To allow the village to keep its identity by not over expanding its boundaries	Noted
It is important to have somewhere for kids to play, outside of their own gardens. This gives a sense of community. These areas could maybe also be used for village events	Noted
"These areas provide facilities for local residents and provide open space around the village. They also provide areas for wildlife.	Noted
These areas provide facilities for local residents and provide open space around the village. They also provide areas for wildlife.	Noted
For historical and ecological reasons and to maintain the aesthetic of the village and protect the needs of the community	Noted
These areas provide facilities for local residents and provide open space around the village. They also provide areas for wildlife.	Noted
All communities need green spaces, for gatherings, mental and physical health. We also have limited resources and expansion would not only put pressure on these but we would loose the unique experience of being a true village with clear boundaries.	Noted
These areas are quintessentially Austerity and make the village unique place It is , especially since a further historic building have been demolished diminishing the village sense of history. Without these spaces It will cease to be a village and become a group of houses near a motorway. These areas are key to the sense of a ancient country village They are also key to people getting together and being a community	Noted
Because we have already lost so much green belt with the many housing developments that have been completed over the last three years or so. Enough is enough, it's destroying our green belt.	Noted
Bishops Piece is owned by Crisps Farm. This is a large field of 11.5 + acres plot of land known locally as Bishops Field (the original much larger Bishops Field connected the Church to Bishops Farm still located on Warton Lane	Noted

Comment	Response
	Noted – refer to support in NDP – justification for LGS
but over time much of the land between has been built on / infilled / surrounded by mostly late 20th century housing.	

Q3. Are there any other areas of open space you would like to see protected? Please describe them and explain why they are important.

Comment	Response
Yes, fields at the rear of the school	SG to discuss
Xxxx	-
Bishops field gives wonderful view and approach to our lovely Church	LGS
I think you named them all q2	-
All green space around newton lane, especially area highlighted for HS2	SG to discuss – outside settlement boundary anyway?
Bishops field, by the church. If this were no longer an option available to walk dogs in the village, I cannot image where we would all exercise our dogs. It is heavily used for this, with many older village residents meeting up to walk dogs together in the field, providing a social activity for many who may not otherwise see others in our community, which all adds to the cohesion of the village as a whole. It is a really important asset to our village and would be wonderful to see it officially recognised as such.	LGS
all the surrounding fields of the village to maintain our rural village and prevent excessive developments	Protected by settlement boundary
small plot at end of Orchard Close and Newborough Close maybe communiy fruit trees	SG to discuss
No None	-
The green space between Warton Lane, Newton Lane and the motorway. This is low lying land so a different diversity of plants are found here and important habitat for wildlife.	SG to discuss Protected by settlement boundary
Woodlands off cinders lane as previously detailed and bishops field both play central parts to retaining an area of open space for the current and future generations, the playing fields also provide community areas and gathering places for all	SG to discuss
Again any areas that are outside the village i feel should be protected so the characteristics and feel of the village are maintained.	Protected by settlement boundary
Area between Newborough Close & Orchard Close	SG to discuss
"Hazel Meadows Allotment, there is a significant amount of land around this site that could be better managed to the benefit of wildlife and the community in general. Community orchard etc.	SG to discuss

Comment	Response
Better use could also be made of the small open space between Orchard Close and Newborough Close. Windmill Hill Lane is also a vital wild area"	SG to discuss
Fields to the west, south west and north west of the village should be protected green space to ensure a clear green barrier is maintained between the motorway and potential HS2 developments. They provide essential sound suppression, maintain a rural village feel and provide a crucial corridor for wildlife.	Protected by settlement boundary
As Q1 above	-
All interlocking fields from the Bishops Field; fields to the rear of the school; fields going out to Warton	Protected by settlement boundary
Fields behind st Nicholas and to the right of Holly bank. Any green space we should protect for wildlife and preservation of a countryside status. Currently these fields are occupied by cows and horses	SG to discuss
All of it	Protected by settlement boundary
Field adjacent to The Headlands, and all interconnecting fields. Should not be built upon or eroded, kept for agricultural use	Protected by settlement boundary
All fields that sit outside of the village boundary where potential large scale developments can be considered.	Protected by settlement boundary
Can't think of any	-
Nothing specific, but some additional green space adjacent to the village would be appreciated.	Protected by settlement boundary
"- The field behind Glebe Rise should be protected for reasons given in Q1. Any other use would destroy the history of the field and surrounding hedgerows.	SG to discuss
- The open fields to the right and left of Orton Hill. This open panorama is most unusual in our local countryside."	SG to discuss
The field between mount pleasant farm and Glebe Rise back gardens , main road back gardens between Norton Hill and Glebe Rise and Norton hill back gardens that all back onto the field needs to be protected as the field is above our go round level and surface drainage is already a problem running off the slope of the field into our back gardens	SG to discuss
Norton Hill is not wide enough to accommodate any more building off it."	-
Grass area between Orchard close and Newborough	SG to discuss
There are other areas that should be added to this list for example, the field to the rear (or east) or Mill View, the field to the east and north of Austrey Baptiste Church, the field to the rear (east) of Glebe Rise and the field to the north and east of Austrey C of E school. Reasons for protecting these areas are exactly the same as above.	SG to discuss
There are other areas that should be added to this list for example, the field to the rear (or east) or Mill View, the field to the east and north of Austrey Baptiste Church, the field to the rear (east) of Glebe Rise and the field to the	SG to discuss

Comment	Response
north and east of Austrey C of E school. Reasons for protecting these areas are exactly the same as above.	
Small parcel of land in Bishops Cleeve cul de Sac, to protect views to church across field.	SG to discuss
There are other areas that should be added to this list for example, the field to the rear (or east) or Mill View, the field to the east and north of Austrey Baptiste Church, the field to the rear (east) of Glebe Rise and the field to the north and east of Austrey C of E school. Reasons for protecting these areas are exactly the same as above.	SG to discuss
The whole area around the church and pub is the very centre of village life	SG to discuss

Q4. The previous plan identified a number of important views (see map on p21 of the NDP) which need reviewing. Please let us know if there are any public views which you think are particularly important in the Parish and explain why.

Comment	Response
	SG – please check all these suggestions against existing views
I agree with all of these views. Also the views from The Bishops fields going out to Warton	
Xxxxx	-
All the farmland between No Man's Heath and Orton On The Hill up to the Leicestershire border. This will be essential because of North West Leicestershire's published plans to develop Dingles Farm with new warehousing and housing developments from the M42 J11/A444, right up to the Warwickshire border at No Man's Heath. Preserving this land will be vital, particularly if HS2 are allowed to build their planned maintenance depot between Austrey and Newton Regis. If this goes through we could be faced with sprawling industrial development from Newton Regis over No Man's Heath Lane up to J11 and along the A444 to Orton On The Hill. Austrey will no longer be located in a rural setting, but will be situated on the edge of this huge industrial zone.	
the property opposite Charity House, Main Road and surrounding land, as a feature of central village needs attending to!!	
I think the existing important views already identified cover this	-
None	-

The views from Orton on the Hill, Austrey Hill and Warton towards our village.	
The view from bishops field to the church , it is an important and historic area of the village that needs protection, the old telephone box (now library) as it's a symbolic and important part of a village, the pub to church view as they are both important and central to a village	
Unable to locate that map. NDP seems to be 16 pages. This broken "link" may cause questionnaire responders to abandon the survey. I gave up last time!	-
The Church, the Village Hall, all have interesting features and should not be hemmed in by development. The view from Salt Street is particularly splendid and offers a panorama across the Thame / Anchor valley with (by my count) 7 spires. Windmill Hill offers some of the best and widest views in the area.	
At present austrey is not visible from approach roads giving the perception as you approach the village of a smaller village. Future development should not add to massing of the village by encroaching down approach roads or being highly visible beyond the village.	
All views into the village coming down into the village 'valley'; view across from the church across the Bishops Field towards Warton; views across to Warton from Cinders Lane	
N/a unable to see previous plan	-
The land at the bottom of wulfric avenue including the woodland, this is a great adventure for the kids and also helps in their learning process. Reasons also as per my previous answer regarding wildlife .	
I wouldn't change those identified in the original plan.	-
- The views of St. Nicholas parish church and the village from Orton Hill and vice versa.	
Views to the rear (or east) or Mill View, the field to the east and north of Austrey Baptiste Church, the field to the rear (east) of Glebe Rise and the field to the north and east of Austrey C of E school. The views provide open space and countryside views provide a feeling of well being for the residents.	
Views to the rear (or east) or Mill View, the field to the east and north of Austrey Baptiste Church, the field to the rear (east) of Glebe Rise and the field to the north and east of Austrey C of E school. The views provide open space and countryside views provide a feeling of well being for the residents.	
"View to church across Bishops field. Entries to village from Orton Hill, Appleby Hill	
Ensure private land usage does not impact on environmental well being of village. Eg using land for waster removal/ burning."	
Views to the rear (or east) or Mill View, the field to the east and north of Austrey Baptiste Church, the field to the rear (east) of Glebe Rise and the field to the north and	

east of Austrey C of E school. The views provide open space and countryside views provide a feeling of well being for the residents.	
The view across the bishops field , the view of the hill from the footpath behind the houses along main road,The views across the fields from cinders lane are what makes this village a great English village we need to preserve.	

Q5. Should the updated Plan support farm diversification to secure future viability? This could include renewable energy schemes as part of measures to reduce carbon emissions and address climate change.

Comment	Response
No X 3	Noted
Yes X 10	Keep AP4
Depends on the suggested diversification X 30	Keep AP4 See Q6 responses for possible changes to wording

Q6. What other changes / new uses would you consider to be acceptable on farms and why?

Comment	Response
Xxxxx	
So long as it does not mean the removal of hedgerows	Hedgerows already protected in other policies and legislation
Solar. Local business use similar to pimlico farm. Solar farms with grazing for sheep incorporated, livery stables and fields, provision for horse riding on farm land - maybe payable to the farmer? Wind turbines and solar have their place but their size should reflect the surrounding area and wild spaces should be improved wild flower and hedgerow planting.	AP4 protects landscape character
Not sure ? However renewable energy is a good proposed use	-
I don't have any suggestions	-
We should support farmers. We need them so should give proposed changes full consideration. However, the hedges on the way towards Warton should not have been hacked!	-
I am particularly opposed to using good farm land to produce inedible crops to feed an anerobic digester in persuit of a quick buck.	Best and most versatile farmland is mentioned in NPPF – perhaps add to Policy AP4?
Very limited. Do not want to attract motorsports like stripers Hill outside Polesworth or petting zoos/visitor attractions given the existing queues on the a444 during summer.	Mention traffic impacts / noise / disturbance / roads in AP4?
Renewable energy schemes; more livestock	-

Solar panels for the sake of the enviromemt	
No changes necessary	-
Would prefer farms to be kept as farms	-
None	-
I would support solar farms (low rise / less intrusive) but nor wind farms	Note objections to wind turbines in supporting text?
Renewable energy schemes which do not have a detrimental impact on the landscape or views in and around the village. A shop selling produce grown or sourced from the farm (meat, dairy products, fruit or vegetables).	Mention farm shops?
vineyards, forestation, cut flower - all aimed at reducing carbon emissions by local growing and production	Mention possible uses in supporting text? Most don't need pp
"- No problem with photovoltaic systems provided they are sited with care.	-
- If wind turbine(s) are proposed they should be sited at a sufficient distance from the nearest village residence that there is no impact from noise or flickering light. And, importantly, the investors should sign-up to a scheme in which local households benefit from reduced electricity prices."	Note objections to wind turbines in supporting text?
Biodiversity	Doesn't need pp
Farm shop?	Mention farm shops
More live stock, selling local produce, even vineyards and fruit. More live stock, selling local produce, even vineyards and fruit.	
Reduce removal of hedges. Include wild meadow field straps for wildlife ecological purposes.	Hedges protected Wildlife doesn't need pp
More live stock, selling local produce, even vineyards and fruit.	Doesn't need pp
Solar panels and all the roofs of the farm buildings single turbines were required for farm power. A community cooperative windfarm to power and local homes. These are important because if we don't stop climate change, they'll be nothing to protect.	Mention suggestions in supporting text for renewable energy?
anything that makes it sustainable	-

Q7. Should the Plan include guidance to promote high quality and sustainable design in new development by commissioning Design Codes (local guidance on things like materials, scale, height, sustainability etc)?

Comment	Response
Yes X 41	Commission design codes
No X 1	Noted

Q8. What do you think are important considerations in good design?

Comment	Response Policy to refer to:
Fits in with local surroundings and is similar to local design. Does not dwarf or overwhelm other properties of the surrounding countryside	Context
Xxxx	-
Making places where people WANT to live!	-
That they fit with surrounding properties and do not obscure views.	Context
In keeping with near by houses	Context
Meets current area astecics	Context
"Adequate parking, a space for each bedroom per house, that actually fits a modern sized car.	Sufficient parking
Housing with character (not all identical, in each development).	Variety / visual interest
Allowing adequate space around the new builds, including their gardens, rather than the tendency to pack as many into a small space as possible. "	Density
needs to fit in with the other houses in the village using the same bricks ect	Context
Space	Density
Fits in with the local vernacular. All new should have solar panels at the least. Possibly heat pumps/ turbines	Context Sustainable design
Materials, space both inside and around the building , adequate safe parking for residents and visitors	Density and space standards Sufficient parking
Future proof housing, but nothing too contemporary that would stand out for the wrong reasons.	Context Sustainable design
To fit in with the character of buildings already in Austrey	Context
Sustainable and environmentally friendly	Sustainable design
Housing which reflects the heritage of the village, surrounding properties and should be environmentally sound i.e ground source heading, solar panels, insulation, tree planting, wild areas within the development.	Context Sustainable design
Must be fitting within the current locality and have minimal impact on the village	Context
Similar aesthetics to other homes of a similar age, a conscious design over real life not just blue sky thinking about how people live. For eg there should be provisions for more car spaces per house hold, young people are living with family longer and this means more people having cars at one house. 2 spaces is not realistic and shows a lack of realistic design.	Context Sufficient parking
"The impact on surrounding areas during construction including traffic. Also impact on near neighbours long term. We should have a say on building design.	Residential amenity
I think the potholes are worse since we have had such heavy vehicles accessing the village for building work."	N/A
I am not opposed to inovation, there are a number of impressive new houses in recent developments. I	Context

particularly like the run of houses on Main road adjacent to the vicarage. The Homestead could become a major contributor to the look of Main Road if sympathetically developed. The Village Hall is a gem that should be retained. For the rest - market forces will dictate a style in keeping with the general affluence of the community.	
Ridge heights not exceeding neighbouring properties. Traditional design with brickwork and traditional render not modern composite or metal cladding. Suitably set back from the road. Side access to reasonable size gardens. Sustainable drainage. Renewable energy/low carbon energy sources. Ample parking facilities given the rural location many houses have at least 2 cars and allowances need to be made for visitors.	Height Context Access Sustainable design Parking
Energy efficient dwellings. Enough car parking spaces appropriate to house size.	Sustainable design Parking
Need to fit in with the village; the village has a mixed style of housing and the new developments need to be in line with the surrounding properties and other village properties	Context
Renewable energy	Sustainable design
Fits in to current housing structure and design	Context
Existing villagers views spoiling what their views when buying properties	-
To be in keeping with other property within the village. Not dense	Context
Keeping with existing properties	Context
Blending in with current area aesthetics. House types that keep house prices where they need to be for our village. If there were to be new houses, partner with regional housebuilders and not PLC's. Davidson's build beautiful housetypes something along that line who consider the area.	Context
Respect local aesthetic, and common periods of design	Context
It is difficult to identify any distinguishing local features which should be included in a design guide	-
New development should reflect the fact that this is a village. We should avoid high density development , ensure ample parking space and green areas. New development should be of high quality, use sustainable construction methods and materials and ensure good drainage. New housing should fit with the style of nearby properties to blend well.	Context Car parking Sustainable design
"Maintaining the look and aesthetic of the village, good design whilst not trying to 'mimic' the original, Environmental sustainability, parking	Context Sustainable design
I am going to put this here as i cant find where else to put it - how can we influence infrastructure and the constant robbing Peter to pay Paul scenario with the Telephone and internet lines and the drains and sewers which are struggling with the increased use from existing new builds.	-

"- High quality, energy efficient buildings which are sympathetic to the village ambience.	Context Sustainable design
- Generous spacing between buildings rather than the usual cramped-in layout of modern developments.	Density
- Adequate parking spaces on site to avoid overspill into the village streets where traffic flow and pedestrian safety is already compromised."	Parking
Insulation , solar energy , thermal performance,landscape , environmental, longevity ,public spaces	Sustainable design
Efficiency	Sustainable design
Has to be of good quality and blend with what is already in the village	Context
Quality and house design that are not too outlandish/eccentric Quality and house design that are not too outlandish/eccentric.	Context
Fit in with aesthetics of existing housing. Energy and water efficiency. Sufficient infra structure to support development	Context Sustainable design
Diversity in design so that developments don't look like a toy town. Longevity - will they still be attractive in 50 years? Quality and house design that are not too outlandish/eccentric.	Variety
Green energy use, individuality, affordability, fit in with the existing area	Sustainable design
Individual properties built in the local style (seen in the pub , Manor house etc. This needs to be built into a strict code to recreate the historic nature of the village, which has been eroded by standardised executive houses with no local character.	Context
Attractive well designed energy efficient for long term sustainability	Sustainable design

Q9. Should the Plan promote walking and cycling and reducing local reliance on cars?

Comment	Response
No X 7	Noted.
Yes X 33	Include in NDP

Q10. Do you have any ideas for how we can improve facilities to promote walking and cycling?

Comment	Response
	Add to PC actions – maintain and improve footpaths, investigate new routes – cold map them?
Xxxxx	-

A direct footpath to playing fields which does not facilitate the use of the road. It would encourage parents to let children and young people use this facility.	New PROW? Refer to PC
More walking paths outside of the village,	-
keep the fields in and around the village to allow safe walking route. maintain speed limits within the village to ensure it is safe for cyclist of all ages	Introduce speed limits – refer to WCC?
Clearly defined footpaths - flat pavements that are not dangerous for older people /young children	Improve pavements – refer to WCC?
better footpaths and cycle ways through village and outlying areas	
Ensure local public footpaths are kept accessible.	PROW
Make sure the footpaths are wide enough to be used by all , maitained properly with no vehicles parked on them . Speed restrictions on all village roads to 20mph to help create safe cycling space for all	PROW Parking Speed
Cars a a must in a rural location with an irregular bus service, but building some walking routes and cycle paths would be a great thing, and well use, I imagine.	Improve PROW
None	-
The school should have a walking bus for children in the village like it used to have.	Refer to school?
Ensure right of ways across fields are promoted and access maintained.	Maintain PROW
Protect the open spaces to enable people access to open fields and woodland places to walk and exercise	Settlement boundary
This is a remote village, idealistic thinking needs to be coupled with reality. People need to leave the village for almost everything and there and cars will always be needed. Cycle lanes out of the village would make it safer for cyclists but there is NOTHING that will enforce less cars due to out remote location and the requirement for modern living	Noted.
Secure bike parking scope. Mirrors at some junctions. More slow down signs.	Bike parking?
There are at least 2 footpaths that are effectively closed due to the failure to control dogs on farms.	Refer to WCC?
Dropped kerb required on Newton Lane to allow easier crossing from Headlands/Paget Rise to footpath continuing to hollybank Park with buggies. Remove or reduce barrier width at footpath opposite Nicolas Close to Newborough Close as too narrow for modern wider pushchairs.	Refer to PC / WCC?
Cycle ways Cycle lanes	Support cycling
Just stop building on the green area's where we walk at the moment	Settlement boundary
The village already has sufficient walking and cycling routes. Any cycle routes would ruin the village feel	Noted.
Conves mirrors on junctions. Austrey is crying out for a small tea room for dog walkers and cyclists.	Refer to farm diversification / business?
Improve foot paths, parking spaces and resident parking permits to avoid cars regularly parking on grass and on	NDP cannot control parking

verges and abundance of commercial vehicles taking up space in narrow roads and cul-de-sacs like Holly bank. Holly bank needs more road space over grass bank as have seen several ambulances struggle, and not access for mobility scooters without using road	
Close some country lanes (e.g. Cinder Lane) to vehicles	NDP can't do this
Reduce on road parking by providing ample parking for new housing. Maintain and protect public footpaths. Put weight restrictions on access roads into and through the village.	NDP cannot control parking
"More benches around the village to allow rest breaks for those who would otherwise struggle.	Refer to PC?
manage footpaths so that they are useable all year	PROW
traffic calming as you approach the village and for people leaving the village would make it safer to be on the footpaths and roads as a cyclist and pedestrian.	Traffic calming – refer to WCC?
"- But, unfortunately, any significant improvement in cycling is beyond the scope of the parish, requiring long-distance routes to be developed.	-
- A footpath up Norton hill - at least as far as the footpath across the fields - would avoid walkers having to climb the verge whenever a vehicle passes."	New PROW?
More public footpaths ,increase safety on roads for cyclists, fill in pot holes , make bike lanes so children and parents can cycle to school safe place to store bikes at school .pelican crossing by on main road to st Nicholas close .	Discuss
Better maintenance to paths and gateways	PC
Hedges that border onto pathways should be kept maintained and cut back from overhanging	PC / landowners
Improvement of public footpaths, protection for cyclists and pedestrians on the roads. Improvement of public footpaths, protection for cyclists and pedestrians on the roads	-
No	-
Better signposting of public rights of way, maybe some maps of walks around the area.	PC?
Stop building in a a village with little local employment means everyone has two cars and drives to work. The local roads are too small to accommodate safe cycling. We need more footpaths that are well kept to enable local walking for health	-
We can't control the bad drivers that drive through our village. The standard of driving, especially speeding has increased since the new housing developments	-
20's plenty within village speed limits	New speed limit?

Q11. The 2021 Parish Housing Needs Survey showed a local need for smaller houses, houses for older people to downsize into while staying in Austrey, and more affordable housing. Should the Plan include a policy which sets out the types and sizes of houses needed in the Parish?

Comment	Response
Yes X 35	Include policy
No X 9	

Q12. What type of houses do you think are needed in Austrey eg size, social, market housing etc?

Comment	Response Note any not covered in Policy AP11
Bungalows and small houses for first time buyers with preference given to village young people	In AP11
Xxxxxx	-
Smaller one level homes suitable for older residents with easy care gardens.	In AP11
2 bed and affordable	In AP11
Single storey housing for our older residents	In AP11
I feel more smaller.family houses 3-4 beds so people can move up the property ladder when having families. but don't think the village needs anymore houses	In AP11
Austrey has had enough houses built in it recently. Every bit of spare land has been built on.	-
social housing and bungalows but a block on more building sites of any great size	In AP11
As above - elderly downsizing, social housing, starter/affordable homes. Not just "executive" homes.	In AP11
2 bed cottage type homes , family homes all with adequate parking and garaging	In AP11
Smaller, affordable (but not social) housing, plus affordable bungalows	In AP11
Bungalows and smaller private houses	In AP11
None	-
Bungalows and smaller homes for first time buyers.	In AP11
I don't think anymore houses are needed in Austrey , the previous target has been met and exceeded by quite a way from my recollection (What's the point in previous targets, if there is constant building ?) There are still ongoing builds in the village that I think are more than enough ...	Refer to PHNS
Unfortunately there are times that you cannot cater for everybody's need and living in a village is one such time If you plan to cater for smaller houses, social housing, bungalows, high rise flats etc etc the village will become an extension of tamworth and this is not why people move here, the majority of people who live in the village have paid for the privilege and that's what keeps it a village ..	Refer to PHNS

I am in no way a NIMBY but really don't see what benefit further building will have. From a personal point of view if all the sites mentioned in this report were built on me and my family would move out of Austrey"	No sites in NDP
I think there are no needs for the village. There is plenty of stock in the market ranging from terrace houses to large. There needs to be more evidence of low stock before we start thinking we need to build a specific types of housing. There is no need for social housing specifically as social housing in the village has no requirement to be populated by austrey villagers therefore its not a need of the village	Refer to PHNS
Family affordable/appropriate houses to encourage young families.	In AP11
Bungalows & starter homes	In AP11
Since the 2021 survey many more houses have been built in Austrey including bungalows and affordable housing on Wulfric Avenue certainly enough for the respondents to the 2021 needs survey if they were genuinely determined to move. There are 8 3-4 bed properties on the market today starting from £300k which in todays market conditions I would argue presents reasonable affordable housing for the value offered. Rural properties, with larger gardens and village community feel are always going to attract a premium and should do. In the short term I see very limited need for additional housing.	Refer to PHNS Affordable housing has a technical definition in planning
Longer term as the population ages there is arguably a greater need for smaller properties and bungalows but these would need to be located in easy walking distance of the village amenities of the shop, church, bus stop and pub and therefore suitable locations in these areas need to be identified. I would suggest no more than 500m from the shop would be reasonable for an elderly person with limited mobility and pavements and dropped kerbs for mobility aids would be necessary.	Covered in NDP in accessibility Policy AP8
New development should include green spaces to ensure the rural nature of the village is reserved. Small cul de sacs should also be queried as people are regularly struggling to find some of the newer developments and turning down the wrong culture de sacs and having to turn around."	Refer to design policies
Affordable Bungalows and Houses to purchase 2 to 3 beds.	In AP11
I don't think the village can sustain any more housing but if we have to have it; bungalows for our older residents to downsize to and starter homes for our younger villagers to be able to buy as first homes	In AP11
3 bed semi detached I think is the most wanted house type but we need to be careful on not using too much green space to build these. Also don't want to put too much stress on local amenities such as the school when introducing more people to the village	In AP11
2 bed bungalows and houses	In AP11

Non really but if necessary bungalows as the aren't as obtrusive as houses	In AP11
The village does NOT need any further houses building. There is a wide range of properties within Austrey for sale, ranging from affordable houses to executive houses, many taking many months to sell. The village has been overdeveloped in recent years and is in danger of losing its rural feel, noting the vast majority of new houses have not been acquired by local people.	Refer to PHNS
None	Refer to PHNS
I moved to Austrey because of the small family village feel it has. It has a great community feel and is amazing to bring up small children here. I strongly disagree with the need for new housing estates. I think it would be at deterrent to the village. Infrastructure would need to be considered, roads, schools, nuserys.	Refer to PHNS
Retirement homes	In AP11
As set out in Q11	-
Austrey needs housing for first time buyers who wish to stay in the village, and retirement bungalows for those wishing to downsize but remain close to friends and family. We don't have the infrastructure or amenities to support more large family housing.	In AP11
IF more houses are agreed then starter homes, houses for older people to downsize into while staying in Austrey, and more affordable housing	In AP11
Q 13 Further comments	-
The village has grown significantly since the 2014-29 Plan was developed and my understanding is that Austrey has contributed many more new homes than requested in the NWBC Local Plan. Our infrastructure – particularly the access roads - are already at breaking point. The crumbling road surface edges and pot holes of Norton Hill, from village to A444, is testament to the hugely increased traffic flow, much of which travels at too high a speed for visibility on the bends and the broken surface. A serious accident is simply a matter of time. The developers of any new housing in the village should be required to completely renew Norton hill, including reinforced edges with pedestrian pavement and marked passing places.	Refer to PHNS
In heavy rain, the drainage system in Norton Hill at the entrance to the village becomes overloaded resulting in a stream of water crossing the road surface as the camber changes. Particularly hazardous in freezing weather! Any proposed development of the fields behind Glebe Rise will require careful storm water control including a significant retention pond capacity if the flooding of Main Road or the houses in Glebe Rise is to be avoided."	Infrastructure
We do not feel Austrey requires any more housing .	Refer to PHNS
Smaller for older people	In AP11
Bungalows for retirees or older residents to down size into if they want to, this would free up more family homes while allowing older residents to get the facilities they need to stay in the village and stay independent. Starter homes	In AP11

are also needed to encourage younger residents as many homes in the village are currently priced over what a first time buyer would need. This would enable residents grown up children to stay local if they wish to	
Smaller houses that local young people can afford and if social housing is built, a policy where local young people have priority.	In AP11
Smaller houses that local young people can afford and if social housing is built, a policy where local young people have priority.	In AP11
Social and assisted living	Add assisted living to Policy AP11?
I believe that no further housing is needed in the village in the coming years. The village has seen substantial growth already and, does not have the amenities to support further population growth.	Refer to PHNS
Bungalows, social housing	In AP11
Small houses for sale to local young adults who wish to stay in village. Bungalows for downsizing. We have far too many executive style houses for one small village. Encouraging young families with small affordable housing is key, alongside downsizing properties	In AP11
We have enough houses now.	Refer to PHNS
Mix including downsizing property such as bungalow and affordable housing for young families and family housing	In AP11
